Subject: Microsoft Settlement

I am opposed to the proposed settlement in the Microsoft antitrust trial. I feel that the current proposed settlement does not fully redress the actions committed by Microsoft in the past, nor inhibit their ability to commit similar actions in the future.

Even after being found guilty of being an illegal monopoly, Microsoft's behavior has not changed. Regulation of their behavior, with the threat of severe criminal penalties for failure to comply, is the only remedy that I can see will curtail them. The market must be able to return to a state of competition.
